

New Rates

For the first time in seven years, we have raised our rates for both insurance and private pay clients. Clients with insurance are unlikely to see much of a difference in “out of pocket” costs; our contracts with each insurance panel specify the allowable rate for each procedure or service. We agree to accept, as payment in full, the amount your insurance allows; so even though we are changing our rates, the amount your insurance allows may stay the same (or even decrease) in 2019.

If you do not have insurance, or cannot afford our private-pay rates, therapy from one of our Licensed Professional Counselors in Training is an excellent option. LPC-ITs have completed their training, passed the National Counselor Exam and must then complete 3,000 hours of supervised counseling to become fully Licensed Professional Counselors. They have years of experience working with clients and are under the direct supervision of our team of seasoned, licensed professional therapists. LPC-ITs charge on a sliding scale and according to each client’s situation; the fees listed below are average rates.

To see a chart of our current rates, please visit <https://gjbhealthservices.com/rates>

*** If unable to give 24 business hours’ notice of cancellation, please notify us ASAP. Please, call us on Friday if you need to cancel an appointment for Monday. Messages can be left with the answering service at any time.**

***If the same client has more than 2 “no shows” or late cancelations, GJB Health Services reserves the right to discontinue the therapeutic relationship. Medicaid and Badger Care clients may be discharged after One no show or late cancellation, since they cannot, by law, be billed for missed sessions.**
